# CAKE SLICE PAPER SQUISHY

Wedge · color · medium · 30–45 min

US Letter · print at 100% · 80–100 gsm paper

2 in:

cut — — — fold (score first) glue tab tape tab: close after filling

1. Let the ink dry. Cover the motif with **clear tape**, then **cut it out** along the solid outer line.
2. **Fold every tab inward once.** Glue the **yellow tabs** to hold them, then **tape each glued seam** from the outside: glue alone doesn't hold on tape.
3. Leave the side with the **blue tabs** open, **stuff lightly**, then close it and **tape every edge**, all along.

# CAKE SLICE PAPER SQUISHY

Wedge · step-by-step guide · medium · 30–45 min

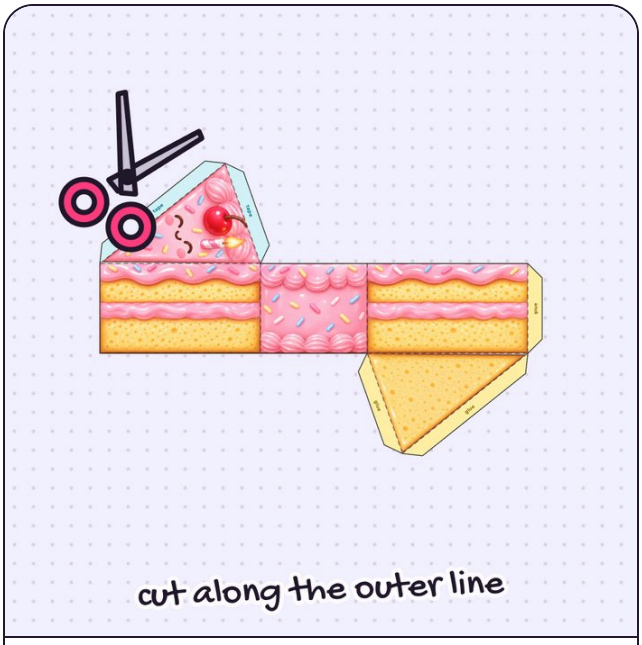

## 1 Print the template

Print at **100%** on plain printer paper (turn off "fit to page"). The scale bar should measure exactly 2 inches (50 mm on A4). Coloring page? Color it in now.

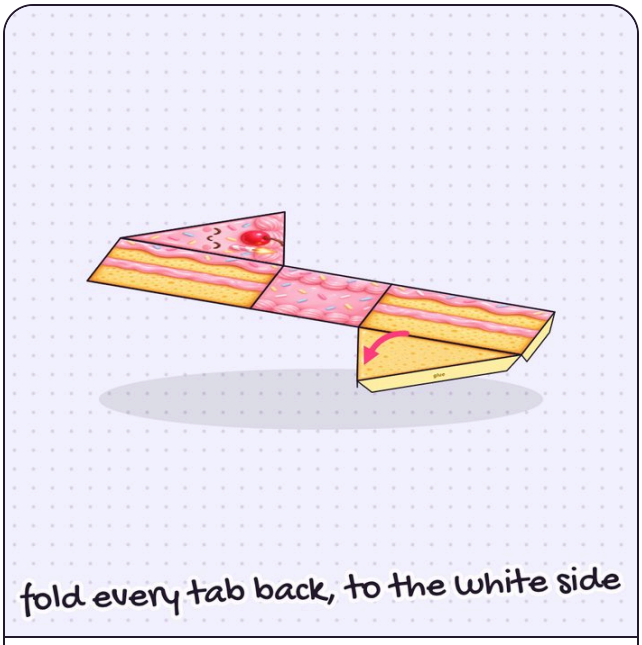

## 2 Tape the motif

Cover the motif with **clear packing tape**, tabs included. Smooth each strip from the center and don't stretch it.

## 3 Cut it out

Cut along the **solid outer line**, tabs included. Don't cut the dashed lines.

## 4 Pre-fold every tab

**Score the dashed lines** with an empty pen and a ruler. Fold **every tab and line inward** (to the white side) once, then open it again: taped paper is hard to fold later.

### 5 Make the walls

Fold the walls into a ring, picture outside. **Glue the yellow side tab** inside to hold it, then **tape the seam** from the outside along its whole length.

### 6 Close the bottom

Put glue on the **yellow bottom tabs**, fold the bottom in and press the tabs to the walls from inside. **Leave the top open**: you fill through it.

### 7 Tape the bottom

Glue alone doesn't hold on tape. **Tape every bottom edge** from the outside, all along the edge.

### 8 Stuff it

Push loose scrunches of plastic bag or fiberfill in **through the open top**. **Stuff lightly** so the box stays square.

**9 Close it**

Fold the **blue tabs** in and close the lid. **Tape every edge** from the outside, all along the edge.

**10 Squish!**

Done! Squeeze it and watch it puff back up. For a slow-rising squishy, prick one tiny pinhole.
