CHOCOLATE MILK PAPER SQUISHY

Gable Box · color · medium · 30–45 min

US Letter · print at 100% · 80–100 gsm paper

2 in:

cut — — — fold (score first) glue tab tape tab: close after filling

1. Let the ink dry. Cover the motif with **clear tape**, then **cut it out** along the solid outer line.
2. **Fold every tab inward once.** Glue the **yellow tabs** to hold them, then **tape each glued seam** from the outside: glue alone doesn't hold on tape.
3. Leave the side with the **blue tabs** open, **stuff lightly**, then close it and **tape every edge**, all along.
4. Milk carton: fill only below the roof, then tape along the ridge and glue the two top fins back to back.

CHOCOLATE MILK PAPER SQUISHY

Gable Box · step-by-step guide · medium · 30–45 min

1 Print the template

Print at **100%** on plain printer paper (turn off "fit to page"). The scale bar should measure exactly 2 inches (50 mm on A4). Coloring page? Color it in now.

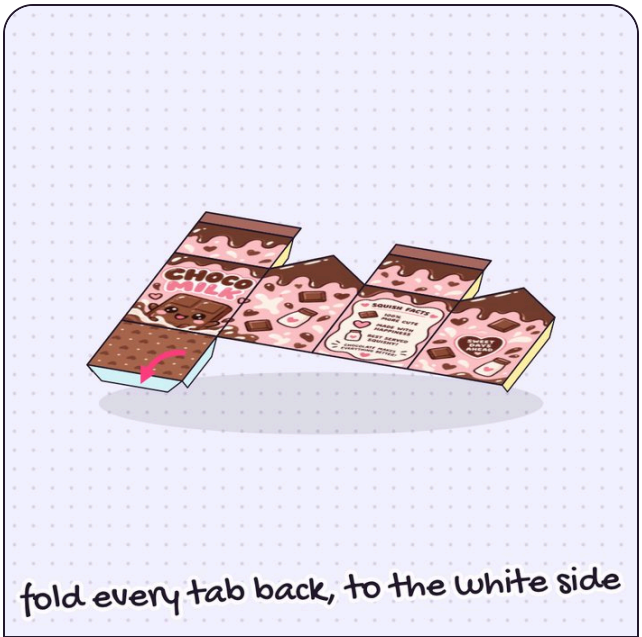

2 Tape the motif

Cover the motif with **clear packing tape**, tabs included. Smooth each strip from the center and don't stretch it.

3 Cut it out

Cut along the **solid outer line**, tabs included. Don't cut the dashed lines.

4 Pre-fold every tab

Score the dashed lines with an empty pen and a ruler. Fold **every tab and line inward** (to the white side) once, then open it again: taped paper is hard to fold later.

Gable Box · step-by-step guide · medium · 30–45 min

5 Make the walls

Fold the walls into a ring, picture outside. **Glue the yellow side tab** inside to hold it, then **tape the seam** from the outside along its whole length.

6 Build the roof

Fold both roof sides in and **glue their yellow tabs inside** the gables. **Glue the two fins back to back** and tape along the ridge. **Leave the bottom open** for filling.

7 Tape the roof

Glue alone doesn't hold on tape. **Tape every roof edge** from the outside, all along the edge.

8 Stuff it

Turn it upside down and **stuff it lightly** through the **open bottom**. Fill only up to the roof.

Gable Box · step-by-step guide · medium · 30–45 min

9 Close it

Fold the **blue tabs** in and close the lid. **Tape every edge** from the outside, all along the edge.

10 Squish!

Done! Squeeze it and watch it puff back up. For a slow-rising squishy, prick one tiny pinhole.
