LEMON SODA CAN PAPER SQUISHY

Can · color · medium · 30–45 min

A4 · print at 100% · 80–100 gsm paper

50 mm:

cut — — — fold (score first) glue tab

1. Let the ink dry. Cover the motif with **clear tape**, then **cut it out**: lid and bottom stay attached. **Fold every tab inward once.**
2. Snip the **bottom** tabs. Roll a tube: glue the side tab, tape the seam. Fold the bottom tabs in, **glue on their outside**, fold the bottom on, **tape its edge**.
3. Snip the **top** tabs. **Stuff lightly**. Fold the top tabs in, **glue on their outside**, fold the lid on and **tape its edge** all around.

LEMON SODA CAN PAPER SQUISHY

Can · step-by-step guide · medium · 30–45 min

1 Print the template

Print at **100%** on plain printer paper (turn off "fit to page"). The scale bar should measure exactly 2 inches (50 mm on A4). Coloring page? Color it in now.

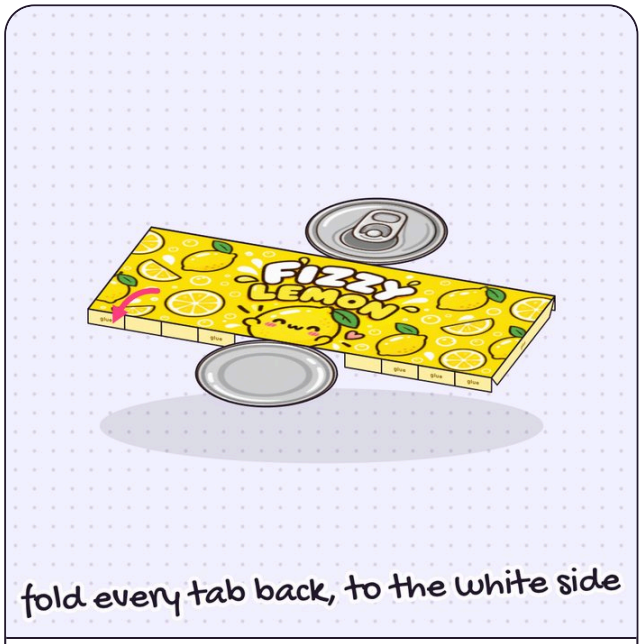

2 Tape the motif

Cover the motif with **clear packing tape**, tabs included. Smooth each strip from the center and don't stretch it.

3 Cut it out

Cut along the **solid outer line**. The lid and the bottom stay attached. Don't cut the dashed lines.

4 Pre-fold every tab

Score the dashed lines with an empty pen. Fold **every tab and both circle hinges inward** (to the white side) once, then open them again.

Can · step-by-step guide · medium · 30–45 min

5 Snip the bottom tabs

Snip only the short lines between the bottom tabs, right up to the fold line. The top tabs come later.

6 Roll the wrapper

Roll it into a tube, picture outside. **Glue the yellow side tab** inside to hold it, then **tape the seam** from the outside along its whole length.

7 Glue the bottom on

Fold the **bottom tabs** in. Put glue on their **outer side** (the yellow side, now facing up). **Fold the bottom circle** onto them and press it firmly.

8 Tape the bottom

Glue alone doesn't hold on tape. **Tape the bottom edge all the way around** with overlapping strips.

Can · step-by-step guide · medium · 30–45 min

9 Snip the top tabs

Now **snip the short lines between the top tabs**, right up to the fold line.

10 Stuff it

Stand it up. **Stuff it lightly** through the **open top**; keep the lid folded back.

11 Glue the lid on

Fold the **top tabs** in. Put glue on their **outer side** (the yellow side, now facing up). **Fold the lid** onto them and press it firmly.

12 Tape the lid

Glue alone doesn't hold on tape. **Tape the lid's edge all the way around** with overlapping strips: the tape holds it for good.

13 Squish!

Done! Squeeze it and watch it puff back up. For a slow-rising squishy, prick one tiny pinhole.
